

Master Brewers Association of the Americas (MBAA) and Cask Brewing Systems collaborate on [MBAA Beer Packaging Technology](#), 2nd Edition Book, Small Scale Canning Lines, expect deliveries of the hardback copies by mid-May.

We are excited to announce that we have collaborated with the MBAA to create a new chapter in the second edition of their [MBAA Beer Packaging Technology](#) book. It's the most up to date English language packaging book on the market which will be a standard in the industry. The new edition will include a chapter on small scale canning lines and their operations featuring Cask canning systems, due to hit shelves mid-May.

This is an extension of our past collaborations with the MBAA. Our original presentation at their annual Convention in Portland in 2012 was so well received that they invited us to speak at their brewing courses. This then led to the request to include it permanently in their segments on small scale packaging.

Past MBAA Cask Presentations at:

MBAA Convention, March 2012, Portland, Oregon

Brewery Packaging Technology Course, April 29 - May 10, 2012, University of Wisconsin

World Brewing Congress 2012, July 28 - August 1, 2012, Portland, Oregon

Brewery Packaging Technology Course, April 28 - May 9, 2013, University of Wisconsin

About MBAA

Master Brewers Association of the Americas was formed in 1887 with the purpose of promoting, advancing, and improving the professional interest of brew and malt house production and technical personnel. Today, MBAA is a dynamic, global community working to advance the brewing, fermentation, and allied industries by: advocating the exchange of knowledge; creating, assembling, interpreting, and disseminating credible and beneficial information; developing world-class education offerings; and providing valuable personal and professional development opportunities. MBAA has more than 2,700 members in 23 different districts from more than 55 countries throughout the world.

About Cask Brewing Systems Inc.

Cask Brewing Systems has been working with the Craft Brewing industry since the early 1980's and has been building canning equipment for over a decade with more than 300 craft breweries in 20 countries worldwide using our systems. We provide the whole canning solution – equipment and cans (through Ball Corporation) and guide you through the label design process.
